***Charge-and-Fly™ Park Flyers***

*No building. No hassles. Just fly.*

*That's the ParkZone promise.*

*ParkZone<sup>®</sup> Charge-and-Fly<sup>™</sup> aircraft are designed for experienced RC pilots who want the thrill of a high-performance park flyer without the hassles of building one. You get everything you need to go from box to sky in as little time as it takes to charge a battery pack. That includes:*

- *Fully proportional FM radio system*
- *Rechargeable battery pack*
- *Transmitter batteries*
- *Variable rate DC charger*

# Cessna 210 Centurion

PKZ3010

*Power Packed In a Small Punch*

**PKZ3000**

*Wingspan: 15 in (380mm)  
Length: 12-13/16 in (325mm)  
Weight (RTF): 0.6 oz (18 g)*

**PKZ3005**

*Radio: 3-channel 2.4GHz with digital trims and super-light, fully proportional digital servos for precise control  
Battery: 3.7V 70mAh Li-Po battery  
Gearing: 5.28:1*

MINIUM

*The Cessna 210 Centurion is a micro-sized yet powerful replica of the renowned aircraft. At just 18 grams, this is an extremely lightweight and unbelievably maneuverable indoor flyer. The Cessna operates on 2.4GHz so you can fly without worry of interference. When it's not being flown, just place the Cessna in its own display stand with built-in charger and it will be good to go for its next excursion.*

- 2.4GHz technology eliminates interference allowing multiple planes to be flown at the same time
- Ultra-micro, 18 g, so small you can fly it in half a basketball court
- Available in three attractive trim schemes
- Display stand houses the DC charger and charges the battery pack in only 15–20 minutes•
- Digital trim adjustment on the transmitter

# J-3 Cub

PKZ1100

**Scale Flying Fun Without the Work**

*Wingspan: 37.25 in (950mm)  
Length: 26.75 in (680mm)  
Weight: 15 oz (425 g)  
Motor: 370 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver  
FM Radio: 3 proportional channels  
Battery: 7-cell 8.4V 600mAh Ni-MH  
Charger: Variable rate DC peak detect (1.2A)*

*Carve lazy eights at half throttle. Shoot tabletop touch-and-go's. Perform simple aerobatics like loops and rolls. The ParkZone® J-3 combines the gentle flying manners and classic lines of its legendary namesake to give you a scale park flying experience that's unlike any other.*

- Ready-to-fly right from the box
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional elevator, rudder and throttle controls
- One-piece wing with struts
- Factory-applied, scale-looking decals
- Mode Change Flight Control™ software
- Super-stable slow speed performance
- Aluminum landing gear with foam wheels

Available only in North America

# Super Decathlon

PKZ1400

*Forgiving Flight Behavior and Aerobatic Ability*

*Wingspan: 35.4 in (900mm)*

*Length: 25.3 in (640mm)*

*Weight: 16 oz (450 g)*

*Motor: 370 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 7-cell 8.4V 600mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.2A)*

*Few airplanes capture the spirit of flying for fun like the Super Decathlon. Now you can experience the fun for yourself with ParkZone's great-looking Charge-and-Fly™ rendition of this aviation classic.*

- *Ready-to-fly right from the box*
- *Includes FM transmitter, batteries and variable rate DC peak charger*
- *Fully proportional rudder, elevator and throttle controls*
- *Factory-applied scale-looking decals*
- *Reusable receiver/ESC module and servos*
- *Two transmitter selectable flight modes*
- *Wheel pants with matching scale decals*
- *Stainless steel landing gear with foam wheels*

# SLO-V™

PKZ1300

**X-Port Enabled Slow Flyer Fun**

*Wingspan: 45.9 in (1170mm)*

*Length: 36.75 in (930mm)*

*Weight: 15 oz (410 g)*

*Motor: 370 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 6-cell 7.2V 600mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.2A)*

*With the ParkZone® Slo-V™ you don't have to wait on the weather to fly. Its gear-reduced 370 motor, large diameter prop, large wing area and light wing loading keep airspeeds low so it's equally at home indoors or out.*

- Ready-to-fly right from the box
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional V-tail and throttle controls
- Carbon fiber "stick" fuselage
- Factory-applied decals
- Spare propeller
- X-Port™ accessory system
- Two transmitter selectable flight modes

# F-27B **STRYKER™**

PKZ1200

**Fully Aerobatic, Combat-Ready Flying Wing**

*Wingspan: 37.5 in (950mm)*

*Length: 27.5 in (700mm)*

*Weight: 21 oz (580 g)*

*Motor: 480 Power, direct-drive*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 7-cell 8.4V 900mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.2A)*

*High-speed flybys. Rapid aileron rolls with the flick of a wrist. Slashing and weaving air-to-air combat just a few feet off the deck. This is the kind of adrenaline-fueled action that awaits you with the F-27B Stryker.™*

- One-piece Z-Foam™ wing
- Heavy-duty elevon hinges
- 3-cell 1800+ mAh Li-Po compatibility
- Optional Li-Po performance propeller
- Vented electronics compartments
- Ready-to-fly right from the box
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional elevons and throttle
- Factory-applied paint and decals
- Aerial combat capable with optional Sonic Combat Module™
- Two transmitter selectable flight modes

# F-27C **STRYKER** BRUSHLESS

PKZ4200

*High-Speed, Fully Aerobatic Flying Wing*

*Wingspan: 37.5 in (950mm)*

*Length: 27.5 in (700mm)*

*Weight: 22 oz (620 g)*

*Motor: 6-pole brushless direct drive, 1880Kv*

*Speed Control: E-flite® 25A brushless ESC*

*FM Radio: 4+ channels (3 utilized)*

*Battery: 3-cell 11.1V 2200mAh Li-Po w/ balancing charge lead*

*Charger: 2- to 3-cell DC variable rate balancing Li-Po*

# F-27C **STRYKER** BRUSHLESS

**PLUG-N-PLAY®**

PKZ4275

**The ParkZone F-27C is also available in a Plug-N-Play® version.**

### **Includes:**

- 6-pole 1880Kv brushless motor installed
- E-flite 25A Pro Brushless ESC installed
- Industry-standard 3-wire servos installed
- Factory-applied Tiger Meet paint scheme and decals  
(No transmitter, receiver, batteries or charger included)

The high-performance features of the F-27C Stryker™ generate virtually unlimited vertical performance and speeds in excess of 80 mph. If you're looking for a spine-tingling, adrenaline-pumping Charge-and-Fly™ experience that's unlike anything else out there, this is it.

**High-Performance Features Include:**

- Brushless motor and ESC
- Li-Po charger and battery
- Propeller with aluminum adapter
- 72MHz FM radio system with 3-wire servos

**Other Features Include:**

- Ready-to-fly right from the box
- One-piece Z-Foam™ wing
- Heavy-duty elevon hinges
- Two transmitter selectable flight modes
- Fully proportional elevons and throttle
- Vented battery and electronics compartments
- Factory-applied Tiger Meet paint scheme and decals

# P-51D MUSTANG

PKZ1500

**Fully Aerobatic Warbird Replica**

*Wingspan: 39.5 in (1000mm)*

*Length: 34 in (860mm)*

*Weight: 29 oz (820 g)*

*Motor: 480 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 9-cell 10.8V 1000mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.8A)*

*The most successful fighter of WWII, the P-51D Mustang still thrills thousands today in air shows and air races around the world. Now you can experience Charge-and-Fly™ Mustang thrills on a smaller scale with this fully aerobatic, Li-Po compatible reproduction from ParkZone.®*

- Ready-to-fly right from the box
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional elevator, aileron and throttle controls
- Two transmitter selectable flight modes
- Semi-symmetrical aerobatic airfoil
- 3-cell 1800+ mAh Li-Po battery compatible
- Thrilling scale appearance and flight behavior
- Authentic paint scheme, decals and pilot figure

# FW-190

PKZ1600

*The Butcher Bird of WWII*

*Wingspan: 39.5 in (1000mm)*

*Length: 33.5 in (850mm)*

*Weight: 28 oz (790 g)*

*Motor: 480 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 9-cell 10.8V 1000mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.8A)*

Dubbed the "Butcher Bird," the Focke-Wulf 190 was the Luftwaffe's most potent piston-engine fighter of WWII. In the hands of a capable pilot, it was more than a match for any Allied fighter, including the awesome P-51D Mustang. Now you can experience the thrill of flying the FW-190 on a smaller scale with this fully aerobatic Charge-and-Fly™ reproduction from ParkZone.®

- Ready-to-fly right from the box
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional elevator, aileron and throttle controls
- Two transmitter selectable flight modes
- Semi-symmetrical aerobatic airfoil
- 3-cell 1800+ mAh Li-Po battery compatible
- Thrilling scale appearance and flight behavior
- Authentic paint scheme, decals and pilot figure

# SPITFIRE Mk IIB

PKZ1700

**Battle of Britain Hero**

*Wingspan: 39.5 in (1000mm)*

*Length: 33.5 in (850mm)*

*Weight: 26 oz (740 g)*

*Motor: 480 Power with gearbox*

*Speed Control: Power FET proportional ESC/receiver*

*FM Radio: 3 proportional channels*

*Battery: 9-cell 10.8V 1000mAh Ni-MH*

*Charger: Variable rate DC peak detect (1.8A)*

*Folklore calls it the “fighter that saved a nation” during the Battle of Britain, and pilots all over the world remember the Spitfire Mk IIB as the most effective and famous aircraft of WWII. The renowned fighter was flown by various air forces, and even some American pilots, during WWII and for years after. Now you can experience the thrill of flying the legendary Spitfire on a smaller scale with this fully aerobatic Charge-and-Fly™ reproduction from ParkZone.®*

- Ready-to-fly right from the box
- ZX10 FM radio system with 3-wire servos and servo reversing options
- Includes FM transmitter, batteries and variable rate DC peak charger
- Fully proportional elevator, aileron and throttle controls
- Two transmitter selectable flight modes
- Semi-symmetrical aerobatic airfoil
- 3-cell 1800+ mAh Li-Po battery compatible
- Thrilling scale appearance and flight behavior
- Authentic paint scheme, decals and pilot figure

# T-28 TROJAN

PKZ4400

*High-Performance Warbird Replica*

*Wingspan: 44 in (1118mm)*

*Length: 36 in (914mm)*

*Weight (RTF): 30 oz (875 g)*

*ESC: EFL 25A Brushless*

*Motor: ParkZone® 480 960Kv outrunner brushless motor*

*FM Radio: 72 MHz 5+ channel FM proportional ZX10 with*

*3-wire servos*

*Battery: 3-cell 1800mAh Li-Po battery*

*The T-28 Trojan was a piston-powered U.S. military trainer used in the 1950's through the early 1970's. ParkZone's ready-to-fly, electric scale replica of this historical warbird is perfect for the experienced pilot who would rather spend his time flying a mighty scale replica airplane than building one.*

- High quality, reusable 5+ channel ZX10 radio system with 3-wire servos
- Steerable nose gear and fixed main landing gear allows for smooth ROG's and landings
- 11.1V, 1800mAh DC Li-Po battery offers high level of performance and power
- 480, 960Kv outrunner brushless power system
- E-flite 25A brushless ESC

# TYPHOON<sup>2</sup><sub>3D</sub>

PKZ4300

**Unlimited 3D Action**

*Wingspan: 39.4 in (1000mm)*

*Length: 36.58 in (935mm)*

*Weight: 26 oz (740 g)*

*Battery: 3-cell 1800mAh Li-Po battery*

*Motor: ParkZone® BL400-15T gear reduced, brushless motor/ESC*

*FM Radio: 5+ channel FM proportional ZX10 with 3-wire digital servos*

Hovers, harriers, torque-rolls, waterfalls—the Charge-and-Fly™ Typhoon™ 2 3D does them all. The removable side force generators can be attached with just eight screws. And because the wings and fuselage are molded from ParkZone's super-strong, feather-light Z-foam™ material, it can handle the punishment of these high-energy 3D aerobatics without getting bent out of shape.

- Reusable ZX10 72MHz radio system with 3-wire servos for precise control and fast response
- 3-cell 1800mAh Li-Po battery included with variable rate balancing charger
- BL400-15T gear-reduced, brushless motor with E-flite® 25 amp speed control
- Optional side force generators included for improved stability and response in knife-edge flight
- Large control surfaces for maximum 3D performance

## The X-Port Advantage

Besides state-of-the-art technology in a Charge-and-Fly™ package, ParkZone® has another advantage most ready-to-fly park flyers don't—X-Port.™ Available on selected ParkZone planes, the X-Port accessory system lets you expand your flying experience to include exciting functions like air-to-air combat, aerial drops and even night flying. All you do is plug in an optional module. Just look for the  icon to see if your ParkZone plane is X-Port equipped.

### Sonic Combat Module™ (SCM)

Emits a sonic blast with an effective range of 80 feet that temporarily disables the motor of other SCM-equipped planes.
